VTAC**

HORIZONTAL & VERTICAL PACKAGED TERMINAL UNITS TECHNICAL CATALOG

YOUR SATISFACTION, OUR OBJECTIVE

PTAC Key Components

PTAC Standard Features

1 HIGH ENERGY EFFICIENCIES

Efficient design with EER as high as 13.0 and COP of 3.55.
Exceeds current AHRI standards and DOE requirements.

2 OUTLET DESIGN

Optimized air discharge configurations with large axial blower wheels and lower blower speeds resulting in lower sound levels in occupied spaces.

3 COMPRESSOR AND EVAPORATOR FREEZE PROTECTION

Temperature sensors are used to detect if the compressor or evaporator is too cold and then signal to stop the operation of the unit.

4 SELF DIAGNOSTIC

Unit will perform self diagnostics and display appropriate error code.

5 RAPID HEAT MODE

When in Rapid Heat Mode electric heat will be engaged to raise the room temperature quickly. When room temperature is met, the unit will revert to standard heat pump mode.

6 FACTORY TESTED

All units are thoroughly tested before shipping to ensure proper functionality.

7 EASY INSTALLATION AND MAINTENANCE

Cover is one piece including discharge grille and louvers.
PCB is in enclosed electrical box and outdoor components are within molded enclosure. MERV3 filters are easily accessed for cleaning and replacement.

8 TWO-STAGE ELECTRIC HEATER

Electric heaters are available in the sizes indicated in the table.

ELECTRIC HEATER OPTIONS					
Capacity (208-230V)	2 kW	2.5 kW	3 kW	3.6 kW	5
LCDA-I Power Cord	20A - 230V				30A - 230V

9 USER FRIENDLY CONTROLLER

Standard control panel shown as below. Compatible with remote controller and wired wall thermostat.

PTAC Standard Features

- 10 | DUAL FAN MOTORS**
All PTAC units have two fan motors with quiet operation and maximum efficiency. Motors are permanently lubricated to reduce maintenance and totally enclosed to keep dirt and water out of the motor windings.
- 11 | QUIET AND ENERGY EFFICIENT COMPRESSOR**
Smooth operation for quiet, dependable service and high efficiency.
- 12 | SUPERIOR TEMPERATURE CONTROL**
Microprocessor controls are programmed to interface with the temperature sensors to maximize comfort conditions for the room occupant and provide outstanding features.
- 13 | OPERATION MEMORY RESTART AFTER POWER FAILURE**
The unit setting before any power outage will be memorized and resume after power supply restarts.
- 14 | FRONT DESK CONTROL**
The PTAC unit can be turned ON or OFF by front desk control before the tenant moves into the room or after leaving the room.
- 15 | CONTINUOUS FRESH AIR INTAKE**
Fresh air is drawn into the PTAC unit through a manually set fresh air vent.

PTAC Accessories

18 GAUGE INSULATED WALL SLEEVE

- Industry standard dimensions of 42" wide x 16" high x 14" deep.
- Sleeves may be shipped folded for more efficient packing.
- Upon request, wall sleeves can be provided with or without foam insulation.

OUTDOOR GRILLES

- Stamped aluminum grille to attach to wall sleeve.
- Silver aluminum architectural grille with a minimum size of 42" wide x 15.5" high.

PANEL COVER LOCK

- Panel cover with lock to ensure safety and security.

CONDENSATE DRAINAGE HOSE KIT

- Can be attached to the wall sleeve drain pan for the disposal of condensate water.

OPTIONAL CONTROLLERS

- To use additionally to the standard control panel on the unit.

LEVELING LEGS

- Heavy gauge steel black leveling legs with adjustable height of 3 1/4 to 5 1/2 inches from finished floor. Easy to mount and secure to standard wall sleeve.

ELECTRICAL SUBBASE KIT

- Easy to mount and secure to standard wall sleeve, with adjustable height of 3 1/4 to 5 1/2 inches from finished floor.
- Contains a prewired NEMA receptacle outlet. With multiple electrical knockouts for fast and easy installation.
- Decorative side skirting for finished appearance as well as an optional field installed pre-wired disconnect switch and fuse kits.

ELECTRICAL SUBBASE						
Voltage	230 V			265 V		
Current Rating	15A	20A	30A	15A	20A	30A
Material	Steel					
Dimensions (L x D x H)	42" x 4 5/8" x 3 1/4"					

230V Electrical Subbase

265V Electrical Subbase

NON-ELECTRICAL SUBBASE KIT

- Easy to mount and secure to standard wall sleeve, with adjustable height of 3 1/4 to 5 1/2 inches from finished floor.
- With decorative side skirting for finished appearance.
- Dimensions are 42" L x 1 1/2" D x 3 1/4" H.

SPTAC Key Components

SPTAC Standard Features

1 HIGH ENERGY EFFICIENCIES

Units meet or exceed current DOE energy efficiency requirements.

2 COMPACT DESIGN

Standard 26" wide x 15 9/16" high x 21 9/16" deep overall size to accommodate industry standard wall sleeves.

3 COMBINED PANEL AND BI-DIRECTIONAL AIR ADJUSTMENT

Newly designed front panel allows easy access to the air filter and control panel. Furthermore, the front louver can be adjusted to discharge air from 15-55° vertically.

4 SELF DIAGNOSTIC

Unit will perform self diagnostics and display appropriate error code which will be shown on LED display.

5 RAPID HEAT MODE

When in Rapid Heat Mode electric heat will be engaged to raise the room temperature quickly. When room temperature is met, the unit will revert to standard heat pump mode.

6 QUIET OPERATION

The indoor fan operates quietly with three speeds to choose from. The outdoor fan operates with two speeds. The compressor is acoustically isolated to minimize sound transmittance to the occupied space. Sleep mode allows the fan to operate at low speed while delivering comfort and energy savings.

7 OPTIMIZED OUTDOOR FAN OPERATION

While in cooling mode, the outdoor axial blower will direct condensate across the face of the condenser coil, resulting in increased operating efficiency.

8 EASY INSTALLATION AND MAINTENANCE

Filters are easily accessed for cleaning.

9 USER FRIENDLY CONTROLLER

Standard onboard control panel shown as below. Compatible with remote controller.

SPTAC Standard Features

- 10** | **ENERGY SAVER MODE (AUTO FAN)**
When auto fan mode is selected, the unit will automatically choose the optimal running speed for energy saving.
- 11** | **FAN CYCLE SWITCH**
When the unit is ON the fan will run continuously. In auto mode, the fan will be turned on or off according to the operating status of compressor and electric heater.
- 12** | **DUAL FAN MOTORS**
All SPTAC units have two fan motors with quiet operation and maximum efficiency. Motors are permanently lubricated to reduce maintenance and totally enclosed to keep dirt and water out of the motor windings.
- 13** | **SLIDE OUT CHASSIS**
Chassis can slide in and out of the wall sleeve for ease of installation or maintenance.
- 14** | **OPERATION MEMORY RESTART AFTER POWER FAILURE**
The unit setting before any power outage will be memorized and resume after power supply restarts.
- 15** | **CONTINUOUS FRESH AIR INTAKE**
Fresh air is drawn into the SPTAC unit through a manually set fresh air vent.

SPTAC Accessories

INSULATED WALL SLEEVE

- Industry standard dimensions of 26" width x 15 3/4" height x 16 13/16" depth.
- Sleeves may be shipped folded for more efficient packing.
- Upon request, wall sleeves can be provided with or without foam insulation.

OUTDOOR GRILLES

- Stamped aluminum grille to attach to wall sleeve.

OPTIONAL CONTROLLER

- To use additionally to the standard control panel on the unit.

Remote controller
(works with control panel)

SPTAC Product Specifications

COOLING WITH ELECTRIC HEATER

SPTAC-CEH			09-X	12-X
Power Supply		V/Ph/Hz	208-230 / 1 / 60

VTAC Standard Features

- 1 | HIGH ENERGY EFFICIENCIES**
Efficient design with EER as high as 12.1 and COP of 3.55 exceeding current DOE requirements.
- 2 | CAPABLE OF REPLACING OTHER BRANDS**
Our VTAC units can be used as replacements for other manufacturers. Its size of 23"W x 32"H x 23"D and its slide-out chassis makes installation easy.
- 3 | COMPRESSOR AND EVAPORATOR FREEZE PROTECTION**
Temperature sensors are used to detect if the compressor or evaporator is too cold and then signal to stop the operation of the unit.
- 4 | SELF DIAGNOSTIC**
Unit will perform self diagnostics and display appropriate error code.
- 5 | RAPID HEAT MODE**
When in Rapid Heat Mode electric heat will be engaged to raise the room temperature quickly. When room temperature is met, the unit will revert to standard heat pump mode.
- 6 | FACTORY TESTED**
All units are thoroughly tested before shipping to ensure proper functionality.
- 7 | QUIET OPERATION**
The brushless DC motor design operates quietly with a stepless configuration and stable operation.

- 8 | TWO-STAGE ELECTRIC HEATER**
The electric heater is installed on the indoor air outlet to prevent insufficient air volume and internal overheating.

- 9 | FLEXIBILITY**
Our vertical design saves space compared to traditional PTAC units. With its external air duct, one unit can supply conditioned air to several rooms.
- 10 | QUIET AND ENERGY EFFICIENT COMPRESSOR**
Smooth operation for quiet, dependable service and high efficiency.
- 11 | SUPERIOR TEMPERATURE CONTROL**
Microprocessor controls are programmed to interface with the temperature sensors to maximize comfort conditions for the room occupant and provide outstanding features.
- 12 | OPERATION MEMORY RESTART AFTER POWER FAILURE**
The unit setting before any power outage will be memorized and resume after power supply restarts.

VTAC Standard Features

13

FRONT DESK CONTROL

The VTAC unit can be turned ON or OFF by front desk control before the tenant moves into the room or after leaving the room.

14

DUAL FAN MOTORS

All VTAC units have two fan motors with quiet operation and maximum efficiency. Motors are permanently lubricated to reduce maintenance and totally enclosed to keep dirt and water out of the motor windings.

15

CONTINUOUS FRESH AIR INTAKE

Fresh air is drawn into the VTAC unit through a manually set fresh air vent.

VTAC Accessories

18 GAUGE WALL PLENUM

- Industry standard dimensions of 19 3/4" wide x 32" high.
- The depth of the plenum is adjustable from 6" to 15" deep.

OUTDOOR GRILLES

- Architectural grille with a minimum size of 19 3/4" wide x 32" high x 1 1/4" deep.

OPTIONAL CONTROLLER

- 24V wired thermostat or external controller.
